

# **Uniform Medical Plan**

## **Preferred Drug List**

**July 2005**

## Introduction

The goal of the Uniform Medical Plan (UMP) is to provide access to quality health care at an affordable price. As part of this effort, effective January 1, 2004, the UMP began using the *UMP Preferred Drug List* (formulary) to help manage the overall cost of providing prescription drug benefits for UMP PPO and UMP Neighborhood enrollees. The preferred drug list offers a wide range of medications to choose from, and is reviewed regularly by an independent group of health care providers who make sure the list is medically sound and supportive of your health. While UMP covers both preferred and nonpreferred drugs, the drug's preferred status affects the amount the patient pays for the prescription.

This document lists medications sold by pharmacies at the time of printing and indicates whether they are UMP preferred drugs. It is intended for use by UMP enrollees, pharmacies, and health care providers. Unless exceptions are noted, all forms (tablet, capsule, liquid, topical, etc.) and strengths of a drug are included and are covered by UMP.

For drug classes already reviewed by the state Pharmacy & Therapeutics (P&T) Committee, the UMP Preferred Drug List (UMP PDL) includes drugs from the Washington State Preferred Drug List. For all other drug classes, the UMP PDL is based on Express Scripts' National Formulary. Development and maintenance of the UMP PDL is a dynamic process. The state P&T Committee meets quarterly to review additional drug classes. Once these reviews are completed, the UMP PDL may change based on the state P&T Committee's recommendations. Also, the UMP retains the right to update the UMP PDL or shift medications to different tiers during the year if generic or over-the-counter alternatives become available, or if there are changes to the Washington State Preferred Drug List or Express Scripts' National Formulary. We will let you know about any changes to the UMP PDL as they occur.

## Summary of the UMP prescription drug benefit

In your UMP coverage, all prescription drugs are subject to an annual prescription drug deductible, whether purchased through our mail-service pharmacy or at a retail pharmacy. Once you have met this deductible, your cost for a prescription will vary based on a number of factors, such as whether you purchase it at a UMP network pharmacy or through mail service, whether it is a generic drug, and whether it is a preferred or nonpreferred drug. Each of these categories has a different enrollee cost-share tier, as shown in the table below.

## Covered drugs

Medications are eligible for coverage only if they are Food and Drug Administration (FDA)-approved medications. This benefit covers legend drugs (those that can only be legally obtained with a prescription), including:

- Allergy antigens
- Chemotherapeutic agents
- Contraceptive drugs
- Fluoride (for preschool children over 6 months of age when primary water source is deficient in fluoride)
- Injections of certain prescription medications

- Methadone
- Prenatal vitamins (during pregnancy)

Please note: UMP does not cover experimental and investigational drugs or drugs used for experimental “indications.” Conditions are considered *non-experimental* indications if they are shown on the drug’s label or if the drug is recognized as an effective treatment by most scientific evidence and informed professionals.

#### **Additional drugs that are specifically excluded from coverage include:**

- Drugs to treat impotence
- Drugs to treat infertility
- Dietary supplements (vitamins, minerals, herbal supplements)
- Drugs used for cosmetic purposes
- Drugs to treat obesity
- Over-the-counter drugs or drugs with over-the-counter equivalents, except: insulin, prenatal vitamins, nicotine replacement therapy, and OTC Prilosec (omeprazole).

Please check the appropriate UMP Certificate of Coverage for certain exclusions, limitations, and prior authorization requirements that apply to some medications.

#### **How to use this guide**

This guide lists medications in different ways to help you find prescription medications and their respective cost-share tiers. Section 1 displays drugs alphabetically and gives the therapeutic class chapter number, where you can locate the specific drug coverage information. Section 2 lists drugs by therapeutic chapter and summarizes coverage limitations applicable to those products. The information below will help you read the guide, and understand what each column means.

If you need a printed copy of this document, please call 1-800-762-6004.

Column heading	Explanation		
Cost Share Tier	Prescription drug cost-share		
	Tier (up to a 90-day supply per prescription or refill)	Enrollee's cost at a network retail pharmacy	Enrollee's cost using mail-service pharmacy
	<b>Tier 1</b> Generic drugs <sup>1</sup> , all insulin, and all disposable diabetic supplies	20% coinsurance or enrollee cost-share limit <sup>2</sup> , whichever is less	\$10 copay <sup>3</sup>
	<b>Tier 2</b> Preferred brand-name drugs	30% coinsurance or enrollee cost-share limit <sup>2</sup> , whichever is less	\$40 copay <sup>3</sup>
	<b>Tier 3</b> Nonpreferred brand-name drugs	50% coinsurance (maximum cost-share limit does not apply)	\$80 copay <sup>3</sup>

Column heading	Explanation	
	<b>Coverage for nonprescription medication (over-the-counter)</b>	<p>Prescription medications with over-the-counter (OTC) equivalents are indicated by an “OTC” in the “Cost Share Tier” column in Section 2. Unless otherwise indicated in this document, UMP does not cover either OTC products, or prescription products for which there is an OTC product available with the identical active ingredients and strength, and in a comparable dosage form.</p>
	<sup>1</sup> Generic drugs have the same active ingredient(s) as brand-name drugs no longer under patent, and are usually less expensive. They are typically sold under an alternate brand name or the generic (chemical) name for that drug. <sup>2</sup> A cost-share limit based on the number of days’ supply purchased applies to Tier 1 and Tier 2 drugs that are purchased from a UMP network retail pharmacy. Please refer to the UMP <i>Certificate of Coverage</i> for details. <sup>3</sup> If the actual price of the medication is less than the standard copay, enrollees pay a minimum charge of \$8.99 or the cost of the drug, whichever is greater – but not more than the standard copay.	
TIP	<b>Therapeutic Interchange Program (TIP)</b> Certain drug classes are subject to the state therapeutic interchange program (TIP); medications subject to TIP have “yes” in the “TIP” column. TIP was established by a new state law that applies only to state-operated prescription drug programs (such as UMP). If the prescriber has endorsed the state’s preferred drug list, pharmacists may be required to substitute the UMP preferred drug for the nonpreferred drug when filling prescriptions for UMP enrollees. A UMP enrollee may specifically ask the pharmacist to dispense the nonpreferred drug, but the enrollee’s out-of-pocket costs will be higher (Tier 3). For more information on TIP, please visit <a href="http://www.rx.wa.gov">www.rx.wa.gov</a> .	
Spec	<b>Specialty pharmacy</b> Prescription medications that require special handling have “yes” in the “Spec” column in Section 2. UMP enrollees may receive up to a 90-day supply for these prescriptions at mail-service, but no more than a 30-day supply per prescription or refill at retail pharmacies.	

Column heading	Explanation
QLL	<p><b>Drugs with quantity level limitations</b></p> <p>Coverage for some high-risk or high-cost medications is limited to certain quantities within a given period. If there is a quantity limit for a medication, the quantity allowed per 34-day supply is noted in the “QLL” column in Section 2. UMP enrollees who choose to receive these medications outside UMP’s policies are responsible for the full cost.</p> <p>For some medications, UMP will consider requests from prescribers for quantities in excess of the UMP limits if determined to be medically necessary. A phone number appears in the “Suggested or Preferred Alternative” column when overrides are available.</p>
PA	<p><b>Medications requiring prior authorization</b></p> <p>Some high-risk or high-cost medications require prior authorization (PA) to be eligible for coverage. In order for an enrollee to receive coverage for a medication requiring prior authorization, the prescriber must call or submit a letter explaining why the specific medication is necessary. If a drug requires preauthorization, it will be indicated with a PA1 (call 1-800-417-8164) or a PA2 (call 1-800-762-6004) in the “PA” column in Section 2.</p>
COB	<p><b>Medicare coordination of benefits</b></p> <p>Drugs that are often covered by Medicare Part B have “yes” in the COB column in Section 2. For enrollees who have Medicare as their primary coverage, UMP policy is to pay secondary to Medicare for Medicare-covered prescription drugs obtained at retail pharmacies. In these cases, the claims must first be submitted to Medicare before they are submitted to UMP. Prescriptions filled through our mail-service pharmacy do not need to be sent first to Medicare. If Medicare does not cover the enrollee’s prescription, then UMP will pay as if primary. If the drug is one that the pharmacist knows Medicare will not cover, the pharmacist can call Express Scripts (1-800-417-8164) and get a preauthorization. UMP will then cover the prescription without having to get a denial from Medicare in the future.</p>
Suggested or Preferred Alternative	<p><b>Alternatives for nonpreferred prescription medications</b></p> <p>This column indicates the UMP preferred alternative for nonpreferred prescription medications. For medications with OTC equivalents, this column will indicate the OTC product available for the enrollee to purchase at their own cost.</p>
